ImPACT Testing - Online

For the 2022/2023 school year, all athletes/band/dance will complete ImImpact baseline testing online at home.

What is Impact Testing?

- Impact Testing is a tool used by schools, universities, and sports teams to test and determine a concussion baseline score for individual athletes
- The test itself is about 20 minutes long and analyzes things like short and long term memory, reaction speeds, and other cognitive skills
- If an athlete sustains a concussion during a sport season they are required to take a “Post Injury” Impact test. The computer system will compare the baseline to the post injury test to ensure that the athlete has returned to normal brain functioning before he or she returns to play
